Easy and Safe Operation

HOMECHARGE incorporates LED indicators which show 'ready for operation', 'charging in progress' and 'malfunction'.

All important statutory requirements, standards and safety regulations are met and the locking mechanism ensures that power only flows during charging and prevents accidental unplugging during the charging process. Our system is specially designed for fast charging, which greatly reduces charging time and optimizes vehicle availability and charging point utilisation, particularly during the charging process. Fully approved by Mercedes-Benz/Smart electric cars.

Optionally available are our ground mounted stainless steel pedestal and ‘tethered’ 4m cable with fitted J1772 plug unit (suitable for Nissan Leaf, Vauxhall Ampera, Chevrolet Volt, Peugeot i-On, Citroen C-Zero, Mitsubishi i-MiEV and Renault ZE vehicles).

FUTURE PROOF fast, intelligent and easy vehicle charging

up to six times faster than via a conventional socket.

HOMECHARGE offers the ideal solution for safe and secure charging at your home or office.

HOMECHARGE blends in perfectly, both indoors and outdoors and is easily fitted to walls or carports, or mounted to our optional stainless steel ground mounted pillar.

Incorporating Type 2 (EN62196) sockets and Mode 3 (IEC 61851) communication module with locking mechanism, our unit is ready for all electric vehicles on the market and those coming soon.

FUTURE PROOF NOW - **Standard charge**: 240V 3.7kW (16A) & **Fast charge**: 240V 7kW (32A) – also suitable for 3 phase 400V 11kW charging
